

Supply chain

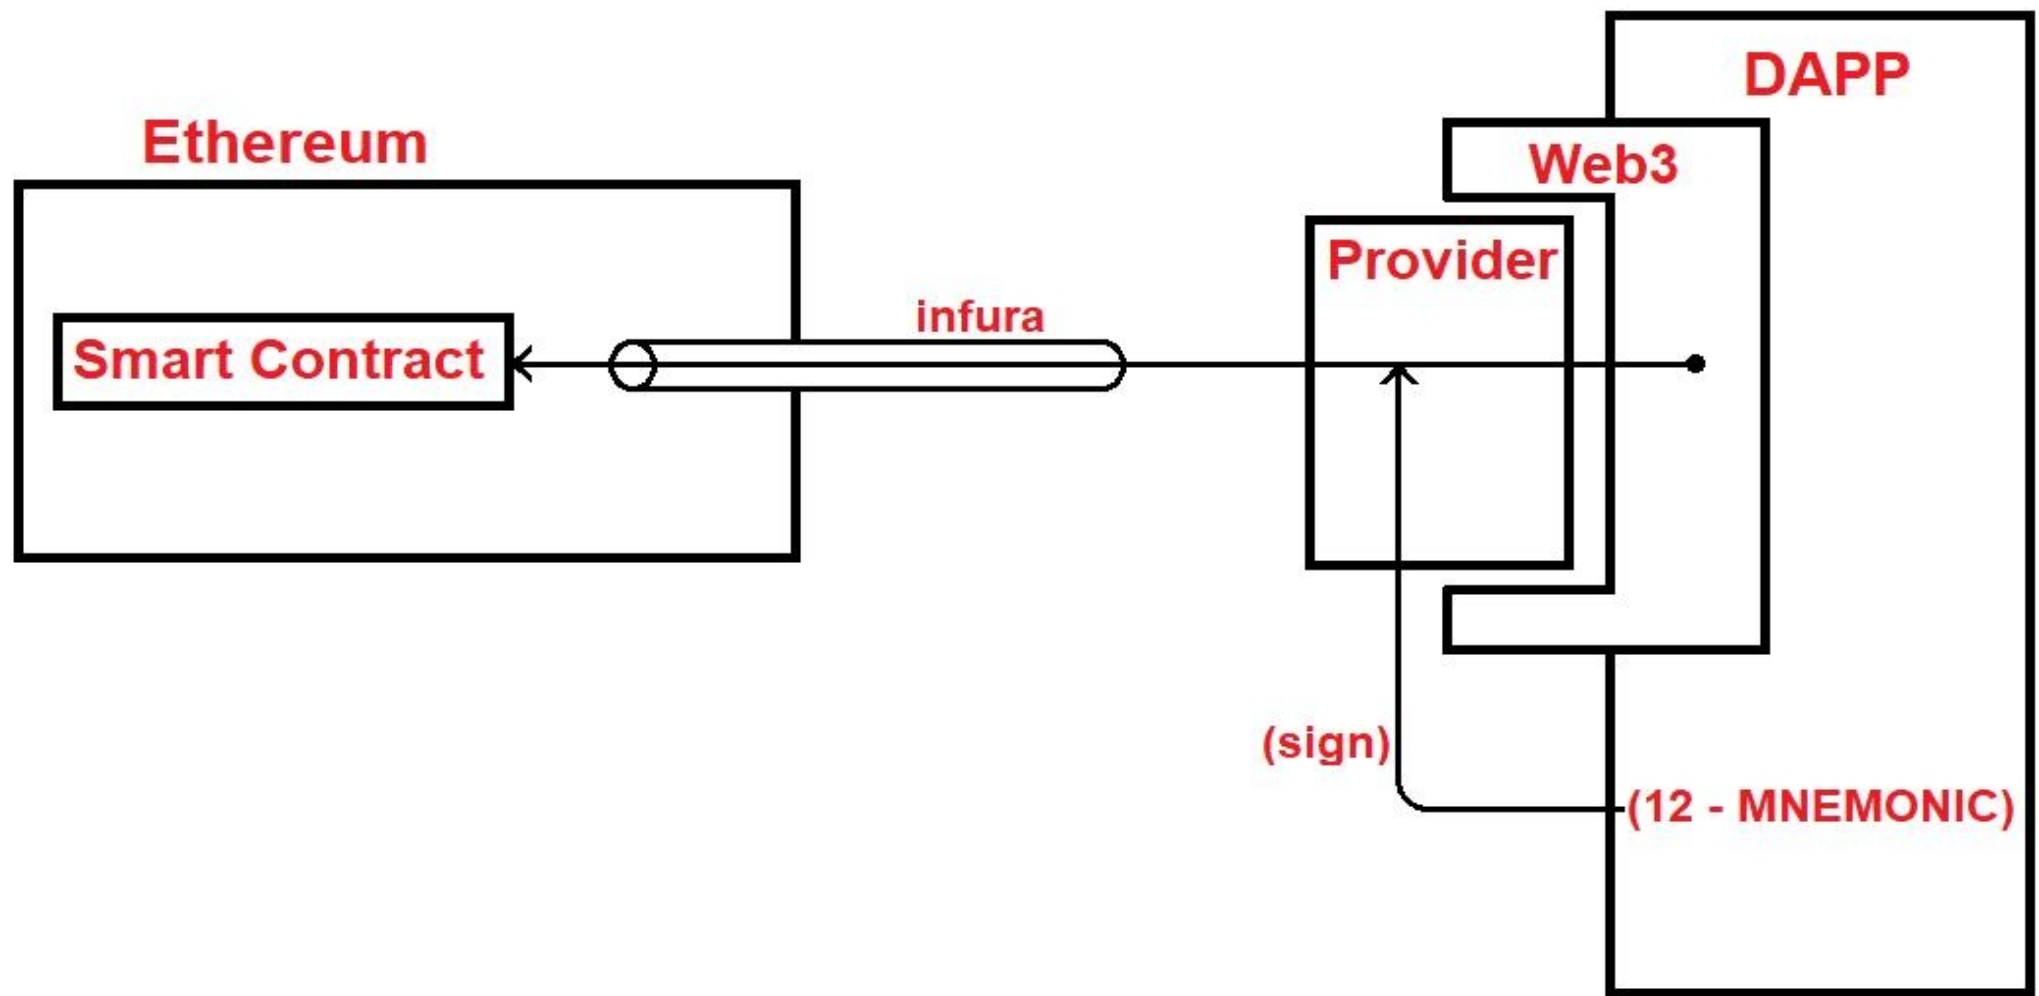

1 - Push XML contents to Back-end

2 - Get content addressing from IPFS based on XML contents

3 - Add content addressing to Smart-Contract

4 - Create transaction

5 - Add transaction hash to MongoDB

Dapp: <https://github.com/nbxtruong/Supplychain-nodejs>

Deploy smart contract: <https://github.com/nbxtruong/deploySmartContract-nodejs>

Smart contract: <https://rinkeby.etherscan.io/address/0xcd96d11540086d4c9749d99a8f5f637f848c9ca7>
